

Prediction Market Systems US

Platform & source register

Revision 1 | Source checkpoint: 26 September 2026, 03:45 AEST | Scope: US public market data and paper simulation

This is the customer reading index for the dated US source register in the course materials. It records the sources used to build the lessons and simulator. Platform rules, fees and eligibility can change; open the linked primary source before relying on an exercise. It is not a current eligibility determination or legal advice.

What was checked

Topic	Source and teaching boundary
API and market fields	https://docs.polymarket.us/api-reference/markets/get-markets Market wrapper, status, quotes, fee and trade increments
Best bid and ask	https://docs.polymarket.us/api-reference/markets/get-market-bbo Top-of-book data is not a guaranteed fill at size
Rules and settlement	https://docs.polymarket.us/learn/markets/market-resolution Final outcome requires the official resolution process
Published fee schedule	https://docs.polymarket.us/fees Market-specific fee curve and effective dates require recheck
Trading and access	https://docs.polymarket.us/learn/trading/access-and-limits/trading-restrictions Eligibility and access requirements require recheck
API change log	https://docs.polymarket.us/changelog Endpoint fields and supported increments may change

Product boundary

The supplied console requests no trading credentials and places no real orders. Sample-mode records and unverified live snapshots are labelled. A paper result is an exercise in evidence and accounting; it is not a return forecast.

Change log and next check

Revision 1 captures the original source checkpoint. Before outreach, the course owner should recheck the linked pages from an allowed US network and log any field or fee changes against the next release. Do not silently substitute a new fee or market rule into an old example.

Full register: course-materials/13_SOURCE_AND_COMPLIANCE_REGISTER.md in the complete founding package. That file is an editorial record, not a statement of expert or legal approval.
